

K Cups 4 Classrooms!

Dear Parents/Guardians,

We have joined the “K Cups 4 Classrooms” movement and have started saving K Cups to repurpose them in the classroom, particularly in math! We are excited to be part of “K Cups 4 Classrooms” as it encourages people throughout the world to save their K Cups for use in a classroom as an alternative to throwing them in the garbage, as we know they cannot be recycled.

It is our hopes that you will help us by saving your own K Cups at home or at work and encourage friends and family members to do the same. A poster is accompanying this note and more can be printed and copied at <https://mrcssharesease.wordpress.com/k-cups-4-classrooms/> As well, we encourage you to share this webpage with others!

Experience shows that 1000 K Cups per class is optimal, so just think of how many K Cups could be “reused” in classrooms worldwide!! We are also excited to possibly partake in a worldwide K Cup tower building challenge toward the end of the school year!

It would be very helpful if the grounds were removed from the K Cups prior to sending them to school. K Cups can be brought into school any time!

If you have any questions, please feel free to contact us.

Thank you for helping us make a positive difference in the world!
